

## UI Development Assignment :

Create a landing page for an image editing portal with interactive UI where the following should be implemented:

- The user selects from a list of options(listed below)
- Each option selection adds to the cost of the editing.
- Users either confirm the Final Price by clicking the “Confirm” button from Confirmation screen/Popup or can go back to option selection view to make desired changes.
- user click on submit button to submit data on server.

Editing Options:

1. Clipping → 5\$
2. Color Correction → \$0.25
3. Background Editing
  - a. Remove Background → \$0.34
  - b. Change Background Color → \$0.78
4. Shadows
  - a. Remove Shadows → \$1.24
  - b. Smoothen Shadows → \$1

Submission Guidelines:

- You have the flexibility to choose a color scheme, animation and functional design elements that showcase your creativity.
- Create a .zip file of all the files and assets with instructions in a text file named inst.txt file on how can we run project and see your work OR You can share link of your projects GitHub Repository with <https://github.com/somabhi890>.
